Data sheet

SIMATIC PS307/1AC/24VDC/2A

SIMATIC S7-300 Regulated power supply PS307 input: 120/230 V AC, output: 24 V DC/2 A

input		
type of the power supply network	1-phase AC	
supply voltage at AC	Automatic range selection	
supply voltage	120 V/230 V	
input voltage 1 at AC	85 132 V	
input voltage 2 at AC	170 264 V	
wide range input	No	
overvoltage overload capability	2.3 × Vin rated, 1.3 ms	
buffering time for rated value of the output current in the event of power failure minimum	20 ms	
operating condition of the mains buffering	at Vin = 93/187 V	
line frequency	50/60 Hz	
line frequency	47 63 Hz	
input current		
 at rated input voltage 120 V 	0.9 A	
• at rated input voltage 230 V	0.5 A	
current limitation of inrush current at 25 °C maximum	22 A	
duration of inrush current limiting at 25 °C		
• maximum	3 ms	
12t value maximum	1 A ² ·s	
fuse protection type	T 1.6 A/250 V (not accessible)	
fuse protection type in the feeder	Recommended miniature circuit breaker: 3 A characteristic C	
output		
voltage curve at output	Controlled, isolated DC voltage	
output voltage at DC rated value	24 V	
output voltage		
at output 1 at DC rated value	24 V	
output voltage adjustable	No; -	
relative overall tolerance of the voltage	3 %	
relative control precision of the output voltage		
on slow fluctuation of input voltage	0.1 %	
 on slow fluctuation of ohm loading 	0.2 %	
residual ripple		
• maximum	50 mV	
• typical	5 mV	
voltage peak		
• maximum	150 mV	
• typical	20 mV	
display version for normal operation	Green LED for 24 V OK	

response delay mayimum	2 s	
response delay maximum voltage increase time of the output voltage	25	
	10 ms	
• typical	10 1115	
output current • rated value	2 A	
• rated range	0 2 A	
supplied active power typical	48 W	
short-term overload current		
 on short-circuiting during the start-up typical 	9 A	
at short-circuit during operation typical	9 A	
duration of overloading capability for excess current		
 on short-circuiting during the start-up 	90 ms	
at short-circuit during operation	90 ms	
bridging of equipment	Yes	
number of parallel-switched equipment resources for increasing the power	2	
efficiency		
·	84 %	
efficiency in percent	O+ /0	
power loss [W]	Q W	
 at rated output voltage for rated value of the output current typical 	9 W	
closed-loop control		
relative control precision of the output voltage with rapid	0.1 %	
fluctuation of the input voltage by +/- 15% typical		
relative control precision of the output voltage load step of resistive load 50/100/50 % typical	0.8 %	
setting time		
load step 50 to 100% typical	0.5 ms	
● load step 100 to 50% typical	0.5 ms	
setting time		
• maximum	1 ms	
protection and monitoring		
design of the overvoltage protection	Additional control loop, shutdown at < 28.8 V, automatic restart	
property of the output short-circuit proof	Yes	
design of short-circuit protection	Electronic shutdown, automatic restart	
response value current limitation	2.2 2.6 A	
	2.2 2.6 A	
response value current limitation	2.2 2.6 A 2 A	
response value current limitation enduring short circuit current RMS value		
response value current limitation enduring short circuit current RMS value • maximum		
response value current limitation enduring short circuit current RMS value • maximum safety	2 A	
response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output	2 A Yes	
response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation	2 A Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178	
response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class	2 A Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178	
response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I	
response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA	
response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.5 mA	
response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.5 mA	
response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP EMC	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.5 mA	
response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP EMC standard	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.5 mA IP20	
response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP EMC standard • for emitted interference	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.5 mA IP20 EN 55022 Class B	
response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP EMC standard • for emitted interference • for mains harmonics limitation	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.5 mA IP20 EN 55022 Class B not applicable	
response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP EMC standard • for emitted interference • for mains harmonics limitation • for interference immunity	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.5 mA IP20 EN 55022 Class B not applicable	
response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP EMC standard • for emitted interference • for mains harmonics limitation • for interference immunity standards, specifications, approvals	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.5 mA IP20 EN 55022 Class B not applicable	
response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP EMC standard • for emitted interference • for mains harmonics limitation • for interference immunity standards, specifications, approvals certificate of suitability	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.5 mA IP20 EN 55022 Class B not applicable EN 61000-6-2

security information

security information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
